

SHRADHHA BHOSALE

AWS Data Engineer | Data Analyst

Pune, Maharashtra | +91 8799837343 | shradhha.bhosale@gmail.com

PROFESSIONAL SUMMARY

Data Engineer / Data Analyst intern with 1+ year of hands-on experience designing and supporting ETL workflows on AWS for real business datasets. Built PySpark and AWS Glue jobs to convert raw, inconsistent data into clean, analytics-ready tables, and structured Amazon S3 storage into Raw and Processed zones for reliable downstream use. Worked across the core AWS data stack (S3, Glue, EMR, Lambda, Step Functions, Athena, Redshift, DynamoDB, RDS, EC2) with guided exposure to streaming tools (Kinesis, Kafka/MSK, SQS, SNS). Applied dimensional modeling, Redshift tuning, and orchestration concepts under senior engineer mentorship, alongside SQL-based reporting and data validation. Detail-oriented and fast-learning, with strong Agile/Scrum teamwork, now looking to grow into a full-time Data Engineer role.

TECHNICAL SKILLS

Data Engineering (AWS):

- Languages: PySpark, Python, SQL, Bash
- Data Collection: Kinesis Data Streams, Apache Kafka (MSK), SQS, SNS
- Storage & Compute: S3, DynamoDB, RDS, EC2, EMR

Data Modeling & Big Data:

- Dimensional Modeling: Star Schema, Fact & Dimension Tables
- Redshift Distribution & Sort Keys, ETL/ELT, Batch & Incremental Processing
- Big Data Frameworks: Apache Spark, Hadoop
- Databases: Amazon Redshift, MySQL
- BI & Reporting: Excel, Power BI

Processing, Orchestration & Security (AWS):

- Processing & Orchestration: Glue, Glue Crawlers, Glue Data Catalog, Lambda, Step Functions, Airflow, EventBridge
- Analysis & Security: Athena, Redshift, IAM, AWS Secrets Manager, CloudWatch

Key Learning & Impact Areas:

- Hands-on ETL Pipeline Development & Data Lake Design
- Applied Data Validation, Deduplication & Standardization
- Pipeline Scheduling & Automation Exposure
- Practical AWS Cloud Computing Skills
- Cross-Team Agile Collaboration (Git, Scrum)

SOFT SKILLS

Collaborator • Fast Learner • Problem Solver • Analytical Thinker • Clear Communicator • Detail-Oriented

PROFESSIONAL EXPERIENCE

Data Engineering Intern | Apr 2025 – May 2026

Brain Vision Technology | Pune, India

- **ETL Development:** Built and maintained PySpark-based ETL jobs in AWS Glue to clean, transform, and standardize apartment listing and attribute data from multiple source formats into analytics-ready tables.
- **Data Lake Management:** Structured the team's Amazon S3 data lake into Raw and Processed zones with clear naming and partitioning conventions, improving dataset discoverability for the analytics team.
- **Streaming Exposure:** Worked on guided exercises simulating event-driven data flows using Kinesis Data Streams, Kafka (MSK), SQS, and SNS to understand real-time ingestion patterns.
- **Automation:** Wrote AWS Lambda functions to automate data validation checks and used EC2 instances to test and support pipeline automation scripts.
- **Analytics:** Queried processed datasets in Amazon Athena and Redshift using SQL to build ad hoc reports and support internal dashboard requirements.
- **Orchestration & Security:** Assisted senior engineers in configuring Step Functions, EventBridge triggers, and Airflow workflows for pipeline scheduling, and applied IAM and Secrets Manager for basic access control.
- **Data Quality:** Ran manual and scripted checks to catch duplicate and inconsistent records, improving the reliability of datasets used in downstream reporting.
- **Agile Collaboration:** Participated in daily stand-ups and sprint planning, shadowed senior Data Engineers on pipeline design decisions, and delivered assigned sprint tasks on schedule.

Data Analyst Intern | Dec 2024 – Jan 2025

Sanyu Infotech Ltd | Pune, India

- **Data Analysis Support:** Extracted, cleaned, and organized data from MySQL databases to prepare it for team-wide reporting and analysis.
- **Reporting:** Built Excel- and SQL-based reports to track key business metrics, helping stakeholders monitor performance at a glance.
- **Data Quality:** Flagged data inconsistencies and gaps during review, helping move the team toward more standardized, reliable datasets.
- **Collaboration:** Used Git for version control while working alongside the analytics team, gaining exposure to the end-to-end data-handling lifecycle.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering (SPPU)

RMD Sinhgad School of Engineering, Warje, Pune | Sep 2023 – Jun 2026 | CGPA: 9.40 / 10
